

New Source Review newspaper advertisements for construction permit applications, September 2, 2004. The following public notices have been published in the newspapers listed below each advertisement. These newspaper advertisements for construction permit applications were published on one of the following dates: August 31, September 1, or September 2, 2004. Public notices are generally published every two weeks. The previous publication of public notices was August 17 – 19, 2004.

PUBLIC NOTICE

The Tennessee Division of Air Pollution Control (TDAPC) has received requests for construction of air contaminant sources as noted below. The proposed construction is subject to part 1200-3-9-.01(1)(h) of the Tennessee Air Pollution Control Regulations, which requires a public notification and 30-day public comment period. Interested parties may express their comments and concerns in writing to Mr. Barry R. Stephens, Director, Division of Air Pollution Control, 9th Floor, L & C Annex, 401 Church Street, Nashville, Tennessee 37243-1531 within thirty (30) days of the date of this notice. Questions concerning a source may be addressed to the assigned Division personnel at the same address or by calling 615-532-0554.

Individuals with disabilities who wish to participate should contact the Tennessee Department of Environment and Conservation to discuss any auxiliary aids or services needed to facilitate such participation. Such contact may be in person, by writing, telephone, or other means, and should be made no less than ten days prior to the end of the public comment period to allow time to provide such aid or services. Contact the Tennessee Department of Environment and Conservation ADA Coordinator, 12th Floor, 401 Church Street, Nashville, TN 37243, 1-866-253-5827. Hearing impaired callers may use the Tennessee Relay Service, 1-(800)-848-0298.

The applicant is Durable Products, Inc. with a mailing address of 137 Dayton Spur Road, Crossville, TN 38557. They seek to obtain an air contaminant permits for air contaminant sources located at 137 Dayton Spur Road, Crossville, TN 38557, as follows:

(1) Shot Blasting Operation (Division identification number: 18-0125-01/57546). This existing operation consists of equipment used for the shot blasting of metal parts. A cyclone is used for control of particulate emissions. There would be no physical construction. Regulated air contaminants are emitted by this source. Mr. W. Medley is the assigned Division person.

(2) Primer and Adhesive Coating Operation (Division identification number: 18-0125-02/57547). This existing operation consists of open roller pan coating of parts with primer and adhesive. Ventilation is provided with an exhaust fan. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be no physical construction. Regulated air contaminants are emitted by this source. Mr. W. Medley is the assigned Division person.

(3) Polyurethane Foam Mixing Operation (Division identification number: 18-0125-03/57548). This existing operation consists of a self-contained, high-pressure delivery system used to mix ingredients to make urethane foam. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be no physical construction. Regulated air contaminants are emitted by this source. Mr. W. Medley is the assigned Division person.

(4) Product Curing Autoclave Operation (Division identification numbers: 18-0125-04/57549 and 18-0125-05/57550). This existing operation consists of two (2) steam-heated autoclaves. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be no physical

construction. Regulated air contaminants are emitted from this source. Mr. W. Medley is the assigned Division person.

For the Cumberland County "Crossville Chronicle"--published once on or before Thursday, September 2, 2004.

The applicant is Whispering Winds, Inc. with a mailing address of 86 Lester Lane, Manchester, TN 37355. They seek to obtain an air contaminant permit (Division identification number: 31-0036-01/57532) to construct a Human Remains Cremation System at 1671 US Highway 41, Pelham, TN 37366. This proposed operation would consist of a B&L Cremation Systems (Model N-20) incinerator. An afterburner would be used to control emissions. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. W. Medley is the assigned Division person.

For the "Grundy County Herald"--published once on or before Thursday, September 2, 2004.

The applicant is Inland Paperboard and Packaging, Inc. with a mailing address of P.O. Box 299, New Johnsonville, TN 37134-0299. They seek to obtain air contaminant permits for construction/modification of air contaminant sources located at 2877 Scepter Road New Johnsonville, TN 37134-0299, as follows:

(1) Recycle Facility (Division identification number: 43-0010-13/57558). This existing operation consists of recycle paper pulp production through several unit operations/process steps. The proposed modification consists of the addition of a new pulper for old corrugated containers. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be physical construction. Regulated air contaminants are emitted by this source. Mr. H. Flores is the assigned Division person.

(2) Calcium Lignosulfonate Pilot Plant (Division identification number: 43-0010-14/57558). This proposed operation would consist of unit operations (reaction, stripping, evaporation and sludge removal) equipment for the production of calcium lignosulfonate. A baghouse and a wet scrubber would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. H. Flores is the assigned Division person.

For the Humphreys County "News Democrat"--published once on or before Thursday, September 2, 2004.

The applicant is Bankhead Furniture of TN, LLC with a mailing address of P.O. Box 338, Lawrenceburg, TN 38464. They seek to obtain an air contaminant permit (Division identification number: 50-0086-01/57270) for construction of a Surface Coating Operation at 1608 North Maher Avenue, Lawrenceburg, TN 38464. This proposed operation would consist of a paint booth used to coat wood furniture parts. Exhaust filters would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. Jim A. Attar is the assigned Division person.

For the Lawrence County "Democrat-Union"--published once on or before Thursday, September 2, 2004.

The applicant is S & S Rock, Inc. with a mailing address of P.O. Box 220, 316 Stafford Road, Old Fort, TN 37362. They seek to obtain an air contaminant permit (Division identification number: 70-0041-02/57557) for two (2) Portable Diesel-powered Generators located at 316 Stafford Road, Old Fort, TN 37362. This existing operation consists of two (2) portable diesel-powered generators used to supply electrical power to the primary and secondary rock crushers. Because of the amount and type of emissions, the use of air pollution control

equipment is not proposed. There would be no physical construction. Regulated air contaminants are emitted by this source. Mr. W. Medley is the assigned Division person.

For the "Polk County News/Citizen Advance"--published once on or before Thursday, September 2, 2004.

The applicant is American Water Heater Company with a mailing address of PO Box 1378, Johnson City, TN 37605-1378. They seek to obtain air contaminant permits for construction/modification of air contaminant sources located at 1100 E. Fairview Ave. in Johnson City, TN 37605, as follows:

(1) Surface Coating Operation (Division identification number: 90-0179-04/57480). This existing operation consists of water based paint surface coating at four (4) spray booths. A baghouse with exhaust filters is used for pollution control. The requested modification is to remove recordkeeping requirements and limits for the amount of coating used. There would be no physical construction. Regulated air contaminants are emitted by this source. Mr. S. Simpson is the assigned Division person.

(2) Surface Coating Operation (Division identification number: 90-0179-20/57481). This existing operation consists of water based paint surface coating at three (3) spray booths. A baghouse with exhaust filters is used for pollution control. The requested modification is to remove recordkeeping requirements and limits for the amount of coating used. There would be no physical construction. Regulated air contaminants are emitted by this source. Mr. S. Simpson is the assigned Division person.

(3) Insulating Foam System (Division identification number: 90-0179-32/57479). This proposed operation would consist of a cyclopentane storage tank, blending and pumping equipment used to produce foam insulation around water heaters. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be physical construction. Regulated air contaminants are emitted by this source. Mr. S. Simpson is the assigned Division person.

For the Washington County "Johnson City Press"--published once on or before Thursday, September 2, 2004.
